ASM Research Chemicals GmbH becomes part of C-squared PHARMA S.à.r.l.

Deutsche Mittelstandsholding GmbH (DMH) announces the sale of its entire stake in group company ASM Research Chemicals GmbH (ASM) to C-squared PHARMA S.à.r.l. (C² PHARMA).

ASM Research Chemicals is a pioneer in the synthesis of PNA (Peptide Nucleic Acid) Monomers and also provides contract manufacturing services for R&D-scale synthesis of complex organic molecules and impurities. It operates a 600 m² chemistry laboratory in the Medical Park Hannover with a staff of 13, seven of whom are PhD chemists, and has completed more than 500 projects over the last decade. ASM has been a subsidiary of DMH since 2016.

C² PHARMA is a Luxembourg-based pharmaceutical group established in 2014. It manufactures and distributes active pharmaceutical ingredients (APIs) and complex chemical compounds obtained from natural and synthetic origins.

By fully consolidating ASM to its group, C² PHARMA can continue supporting its customers throughout their API product life-cycle from the R&D stage with small-scale non-GMP compounds to the commercial stage.
